DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-18, 41-43, 53-65, drawn to a recombinant varicella-zoster virus (VZV).

Group II, claim(s) 19-40, 44-62, drawn to a vector comprising a VZV essential gene.

Group III, claim(s) 66 and 67, drawn to a method of introducing a mutation into a vector comprising a VZV essential gene.

Group IV, claim(s) 68-91, drawn to a nucleic acid cassette.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The special technical feature, a recombinant VZV, is taught by Cohen et al. (PNAS USA, 1993, vol. 90, pages 7376-7380, "Cohen"). Cohen discloses the generation of recombinant VZV (see abstract). The technical feature does not make a contribution over the prior art, therefore, the claims lack unity of invention.

This application contains claims directed to the following patentably distinct species:

If Applicant elects Groups I or II, election of one non-essential region of VZV is required from claims 4, 5, 23, 24, 50 and 51. For example, Applicant may elect the region in the ORF of gene 7, or the region flanking the ORF of gene 7. The election must be consistent between claims 4 and 5; claims 23 and 24; and claims 50 and 51, respectively.

Art Unit: 1648

If Applicant elects Group IV, election of two regions is required from claims, 76, 77, 78, 79 and 80. The election must be consistent between claims 76-80.

The species are independent or distinct because claims to the different species recite the mutually exclusive characteristics of such species. In addition, these species are not obvious variants of each other based on the current record.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 3, 22 and 49 are generic.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species to be examined even though the requirement may be traversed (37 CFR 1.143) **and (ii) identification of the claims encompassing the elected species**, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

The election of the species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the election of species requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected species.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to

Art Unit: 1648

be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the species unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other species.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
